

Mathematics Subject Knowledge Enhancement Courses

A 10 day course to develop your subject knowledge before you start your teacher training course

Have you been accepted for an Initial Teacher Training programme (PGCE or GTP) to teach Mathematics?

Are you confident that you have the breadth of knowledge to teach Statistics, Number and Algebra, Geometry and Measures?

These courses are ideal for graduates with mathematics related degrees who need to enhance their Subject Knowledge in relation to the requirements of the new National Curriculum in secondary schools. Courses take place before you start your ITT course and help you achieve QTS by giving you the knowledge to meet Standard Q14 of the QTS standards – “to have a secure knowledge and understanding of their subject”.

Our courses are tutored by Mathematics specialists and offer both “face to face” tutored sessions and distance learning activities which will address your individual needs. You will also receive access to exclusive on line resources and have the opportunity to network with other ITT trainees.

On completion of the course you will be paid a TDA Bursary of £400.

For an application pack and further details, please contact:

Dominique Gelsthorpe at EM Direct on 01476 512793 or email: d.gelsthorpe@emdirect.co.uk

Course dates: 13 to 29 July 2009

Course Venue: EM Centre for Learning, Grantham, Lincolnshire
